Surefuser+  

SUREFUSER. THE FREEDOM OF AMBULATORY THERAPY

- Earlier patient discharge resulting from increased mobility and improved pain relief, particularly in the post-op setting\(^1\)
- Lightweight, single use and silent device - no malfunctioning alarms or repair costs. Flow rate is confirmed via the bold, precise scale markings
- Sleek, compact design can be worn discretely under clothing or in in patient’s pocket. Also available with a Nipro Surefuser carry bag

THE SIMPLE, SELF-POWERED SOLUTION FOR ALL INFUSION-RELATED THERAPIES

- Single use elastomeric infusion device with fixed or variable flow rates
- Efficient particulate and self-venting filter (0.2µ) and back-check valve
- Strong port connector plus integrated, anti-kinking infusion line (DEHP-free)
- Flat, ergonomic Flow Control Unit to ensure accuracy and reliability
- Available in 100ml or 250ml sizes, 30min to 7 day infusions

Using Surefuser\(^8\)

DESIGNED FOR USE IN A WIDE RANGE OF THERAPEUTIC SETTINGS

- Operating Theatre/Recovery – delivery of post-operative pain relief, potentially reducing the need for opioids and increasing patient mobility\(^1\)
- Oncology – delivery of anti-cancer drugs\(^2\)
- Community & Palliative Care – continuous antibiotic therapy and pain management at home

SIMPLY FILL, PRIME AND CONNECT

- Fill the Surefuser using a standard syringe (Luer Lock is recommended) connected to the port
- Open the Robert Clamp to prime the infusion line, and attach the included patient label
- Attach the connector to the patient’s line, and begin infusion therapy

\(^2\)Stability Data: Drug stability testing has been undertaken by an independent laboratory. For more information please contact Nipro Australia on 1800 451 737.
